

RAJAT VERMA

PERSONAL SUMMARY

DevOps/CloudOps/Automation Engineer with over 6 years of experience in architecting and automating cloud-native solutions. Proficient in Azure Cloud, Azure DevOps, and GitHub Actions, with expertise in Infrastructure as Code (IaC), CI/CD pipelines, and scripting (PowerShell) to streamline delivery lifecycles. Skilled in managing and executing system upgrades and implementing cost optimization strategies. Proven ability to deliver enterprise deployments while ensuring scalability, security, and operational efficiency.

EXPERIENCE

CloudOps Specialist, 12/2024 - Current

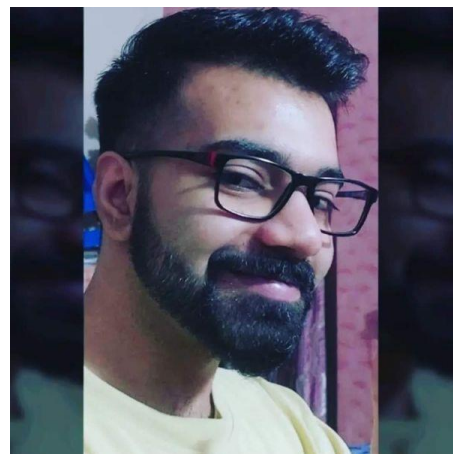

Accenture - Jaipur

- Built and managed Azure Virtual Machines using Octopus Deploy with custom PowerShell scripts.
- Designed and executed end-to-end deployments of web apps and services on Azure via Octopus.
- Performed AKS version upgrades, Python runtime upgrades, and optimized resource utilization to achieve cost savings.
- Identified and decommissioned unused applications; executed safe deletion of Azure Resource Groups after clearing dependencies (Akamai, App Gateway, etc.).
- Authored detailed technical documentation for adding extensions and agents (e.g., Datadog) to Azure resources.
- Resolved security vulnerabilities flagged in Wiz portal by performing package upgrades and patching.
- Developed PowerShell scripts for bulk RBAC-based user access provisioning across Azure resources.
- Created and maintained GitHub Actions workflows for automated deployment of Azure infrastructure and services.
- Automated Azure DevOps (ADO) access management and RBAC assignments to streamline onboarding and compliance.

Sr. DevOps and Automation Engineer, 10/2022 - 12/2024

Mercer - Gurugram, IN

- Deployed scalable applications using Azure CICD, achieving a deployment success rate of 98%
- Enhanced team productivity by sharing Azure best practices, resulting in a 40% reduction in deployment issues

CONTACT

Address: Gurugram, India 250001

TOOLS AND SKILLS

- Ansible
- Azure Cloud
- Azure DevOps
- Octopus Deploy
- Jenkins
- CI/CD Pipelines
- Git
- GitHub
- GitHub Actions
- Docker
- Kubernetes (AKS)
- JFrog Artifactory
- OLAM
- SonarQube
- Datadog
- Wiz Security Portal
- PowerShell
- Bash
- Python
- Automation
- Infrastructure as Code (IaC)
- Terraform
- MSBuild

- Provided PowerShell scripting expertise for automation tasks, saving over 400 man-hours annually
- Developed Re-usable template workflows in Github Actions for building and deploying .net/.netCore/angular/Database Applications which reduced the onboarding time of an Application onto CICD by 60%
- Automated service now Incident resolution for alerts received for various applications
- Integrated CICD with MSSQL database to store data as an Inventory for Audit purposes using Powershell
- Provided 24/7 Support and enhancement for Critical Project Applications Such as Wynsure and Retirement Studio NIFI
- Managed 100+ CICD pipeline configurations across a portfolio of 100+ applications.
- Mercer

Junior DevOps Engineer, 07/2019 - 10/2022

Tata Consultancy Services

- Packaging of Installer deliveries with tools such as Installjammer.
- Communicating directly with the client/onsite team to verify seamless and correct installation of releases
- Engineered automation solutions based on bash script, decreasing manual intervention by 50%
- E2E Migration from jenkins to Azure CICD pipelines
- Addition of Custom Plugins/tasks in Azure pipelines

EDUCATION

Bachelor of Technology, Information Technology, 06/2019

Guru Gobind Singh Indraprastha University - Delhi, India

PROJECTS

- **Wynsure**, <https://www.wyde.com/en/home/products/wynsure.html>, developed Azure CICD for multi-suite of Application with varied functionality.
- **Retirement Studio (Apache NiFi)**, end to end Github Action CICD for Apache NiFi along with integration of NiFi registry
- **Demo CICD using Docker and Kubernetes**, https://github.com/rajat106verma/repo_01/actions/workflows/ci-cd-pipeline.yml, demonstrates the functionality of Docker and Kubernetes in a **Github** Action based CICD pipeline while deploying a sample Node.js application

- Web Deploy
- YAML Pipelines
- Visual Studio
- VS Code
- Windows
- Linux
- Monitoring & Logging
- Cloud Governance
- Cost Optimization
- Security & Compliance

KEY ACHIEVEMENTS

- Rookie of the quarter - TCS, 02/2020, Received recognition for automating manual packaging methods in Tata Consultancy Services
- Make a Difference Award - Mercer, Received recognition for implementing parallel deployment in case of multiple servers instead of sequential which reduced deployment time by 30%
- Dev Consultant - Mercer, Proactively engaged with development teams to reduce build time of applications along with error troubleshooting
- Strategizer, Developed least time taking and efficient strategies for deployment and delivery of Applications
